Ask a question

I am 45 and I haven’t saved that much for retirement yet, but I want to start saving more. I want to contribute some money to my son’s college fund since he is looking at some expensive schools, but he would have to take out a large loan even with scholarships. In addition, I have expenses, such as paying for medication to treat my heart condition and repairs for water damage to my house, that are making it harder to save money.
